

is a complete professional sound and audio editing application. Record, edit, add effects and share your audio. The product will be a good addition to your main line of programs. The program is present on Steam under the name AudioMaker Pro. So, as we said, this is the program that is great for recording tracks. This default program, based on Windows 7 with full support for Windows XP, has proprietary features for recording, editing, as well as a user-friendly interface. In this article we will try to talk about the advantages of this program. Recording sound and working with microphones in Audio Maker Pro After reviewing the menu in the program, we saw the "Tools" section. Therefore, let's take a closer look at the features of the program. The list of new audio tools contains various sliders and controls. Let's consider them in more detail. This is the Connection slider. It allows you to connect microphones with a microphone input to your computer. There is also a function to connect multiple microphones at once. This slider can be adjusted. If you want to include several microphones at once, then just click "Add". You can control the parameters of connecting multiple microphones to the computer at the same time, and applying effects to your track. It is also possible to select the "Automatic" or "Processor Mode" mode. Recording and editing sound from Audio Studio In the same menu there is also such an item "Toolbar". In it you will see several panels. On the left panel is "Troubleshooting". This section will help you find problems in your work and fix them right away. Some of the problems can be found in the "Problem Solutions" section. In the event that you cannot find a solution to the problem, then you should contact the support service. This part may help you solve it. In this section, both support from the program developers and support services will come to your aid. In the right pane, "Record audio from your computer." In this section, there is a function to add sounds from the game to the track, as well as audio files from the archive. You don't have to manually transfer files from the sound system to your computer. It will be enough to copy them and paste them instead of your content in the track. Another interesting tab is "Edit". In this menu, you can adjust various track parameters. There are two main options: "Add sound design" and "Voluntary changes." "Voluntary Contribution" includes the following fields
