Through this performance capture and the HyperMotion engine, FIFA's ball physics improve, while the responsiveness of the game engine increases. This in turn creates much more intelligent and reactive gameplay, especially in tight spaces. Movement will feel more natural and the ball's trajectory is more accurate. The AI also has more proactive behaviour throughout the game, making the player experience more varied and dynamic.

In FIFA 22, the ball will react to the player by swerving more dynamically, taking account of the player's touch, and the goalkeeper will adjust his position and block the

ball in more intelligent ways. All of these factors provide a better, more authentic-feeling game. Live Moments: We will continue to hone the visual quality of gameplay while bringing new aspects to the game. Key features include: Season moments and live player replays; historical matches and animated stories: Live Moments and Short Moments include: Live player replays. We will continue to hone the visual quality of gameplay while bringing new aspects to the game. Play in 60fps: We have been experimenting with the gameplay capabilities of the Frostbite engine in FIFA, and we think that we can get a game running at the full 60 frames per second, which is certainly a lot smoother. With the amount of data, we could of course also achieve other, more gameplay-focused framerates. We think that FIFA will still be a visually stunning game, and have played a good compromise with our players by going into Frostbite as a 60-frame game. The FIFA Team brings together the most skilled athletes from across the world. Based in beautiful southern France, the team's HQ is home to a number of FIFA and sports commentators, including Charlie Colkett and David Tanner, as well as many artists and creators who strive to enhance the FIFA experience. FIFA 22 and the FIFA Team will continue to provide

additional content in order to increase the authenticity and enjoyment of the game. As a result of all the experiments, development of FIFA 22 will be divided into three phases. In the first development phase, which covers from the release of the game in February 2018 up to and including the release of the digital and retail editions, the focus will be on the development of the technical foundations. This includes creating better and more natural movement for players, enhancing the ball

EA SPORTS are known to have spent millions on creating an awesome team in the FUT in FIFA 22. With an

entirely new and improved User Interface, along with the New Career Mode, FUT will continue to be the most loved Team Management experience in all of football. Sophia Choi, Senior Producer of The Journey “I can’t wait to share the excitement of the new FIFA with everyone. We’ve worked with the same FIFA team for nearly 20 years, and there’s no better way to celebrate that than by giving the audience our all to deliver a true football experience – whether you like to play or watch

What's new in Fifa 22:

- **New Bus (Paris Saint Germain, Barcelona, Manchester City, Borussia Dortmund and AS Roma) - a new way to buy cars and get more variety in car builds.**
- **A new “Assists” statistic that shows how many times a player assists to teammates.**
- **Kick-to-foot (new control and gameplay option when laying a ball out from the back) and the ability to play the ball with either foot or head.**
- **X and O formations in free kicks are now controlled by the players, with the ability to call an overload, X out, or FK.**
- **Passing options when sitting back.**
- **Matchday Play community challenges that have been designed to provide maximum depth and strategic variety throughout the entire season.**
- **Player Balance Update.**
- **Matchday Dynamic Events and Random Rewards like “Over 20 goals” - players see more goals scored, see team markers go down and more.**
- **Goal Feeds has also been improved so players don’t get a pitch out signal when hovering over a goal.**
- **Tutorial improvements: are now easier to understand, easier to learn, and more useful for first-time players.**
- **Extensive tweaking to the goalkeeper AI, making them less predictable.**

-
- Instances of that problem causing tired and over-exaggerated reactions are now identified more quickly and corrected.
 - Better AI in the referee system, so referees see more efficient challenges and more fouls.
 - Local Tactics have been improved, with goal kicks taken from set pieces given more time to expire.
 - Goalkeeper AI has been enhanced, making them less likely to foul, but also more likely to be dispossessed.
 - Numerous bug fixes, tweaks and updates.
 - The ability to switch the view on the ball, no longer depends on heading it down on to the pitch.
 - New fouling animations.
 - The ability to show no more than four players on screen on the menu screen, and the ability to show only the goalie on the pitch.
 - The addition of Dribble Zone

Official music by Fatboy Slim. We are living in a golden age for football. It is a sport loved by people around the world - one that creates both individual and team success beyond measure. It's a spectacle that captivates with technical ability, speed, skill and brutality. At EA SPORTS FIFA we're always looking for ways to take our players' realistic movement and attributes to create a more authentic, true-to-life experience and we've worked for years to make that happen. Our efforts have paid off. FIFA 22 is the best football game ever. In FIFA 21 the mechanics of gameplay were made more

authentic by the introduction of player individuality. With a new range of animations, skill trails, goal celebrations and goal celebrations from over the years, FIFA 22 creates more opportunities for players to express their individuality by capturing the style of their legends in the game. All of the excitement that you expect from playing FIFA is present and correct, along with elements that will keep you hooked for hours on end. As a result, the quality of gameplay at the highest level is better than ever. The gameplay innovations we've introduced to FIFA 22 have not gone unnoticed. FIFA 21 received an 84.6% average critic score and was named "Xbox Game of the Year 2016" at the DICE Awards. We are thrilled that feedback from the community prompted the gameplay improvements that we continue to introduce with FIFA 22 and we believe that these improvements will continue to resonate in the club game, which is new to FIFA with the introduction of the UEFA Champions League. The improvements to our gameplay engine mean that EA SPORTS FIFA 22 is even better looking than FIFA 21. We've quadrupled the number of overall lighting

effects; improved the shadows; improved rain and night lighting; and tuned the way player models react to the light. The player models now accurately reflect the individual traits of their positions: they look like they are naturally lit and breathe life into the stadium. Whether you are watching from the sideline, on the bench or in the dugout, the atmosphere is richer and more authentic than ever before.

Developing the game and making it as realistic as possible has never been more rewarding. EA SPORTS FIFA 22 delivers the authentic emotions of the beautiful game that we have all been longing for since our first football game, FIFA 96. The game is more of a journey. As a host of new features are introduced, the game offers a variety of
